## A Paint Chip Repair Kit That's Simple & Works!

Maybe you've tried buying touch-up paint at the local auto parts store. You tap and maneuver the brush to get just enough paint on the tip, to address the first few chips on your hood. You figure the paint will magically blend in once it dries. The next day you realize you gave your car a case of the measles, which now stand out more than the chips did. But not with our repair kit!
