

AOL 9.0 provides enhanced security features that may be blocking access to portions ecklers.com. The most common solution is to set up Ecklers as a trusted site. AOL provided the following instructions.

To designate trusted sites

1. On the AOL toolbar, **click Settings**.
2. In the Settings window, **click the Index tab**, and then **click Internet (Web) Options** from the alphabetical listing of settings.
3. In the AOL Browser Settings window, **click Internet Explorer settings**.
4. Click the **Security Tab**
5. Click the **Trusted sites** icon.
6. Click the **Sites** button.
7. **Enter the url or the site's domain** for each site you want to include. **The domains for Ecklers** are : ecklers.com, ecklerscamaro.com, classicchevy.com, ecklerstrucks.com, lategreatchevy.com
8. Optionally, click the **Require server verification** checkbox.
9. Click **OK**.

If you are still encountering problems accessing Ecklers after setting up trusted sites, please review and try one of the following tips provided by AOL:

CLEAR THE WEB BROWSER CACHE AND UNINSTALL THE AOL® ADAPTER A damaged Web browser cache and/or a damaged AOL Adapter may cause this issue. Windows® networking requires that a network adapter exist for any application that must access the Internet. The AOL® software uses the AOL Adapter to access the Internet.

1. Sign off and close the AOL software.
2. On the end of the Windows taskbar next to the clock, click the AOL icon, then click SYSTEM INFORMATION. NOTE: If the AOL icon is not displayed, click START, select PROGRAMS or ALL PROGRAMS, select AMERICA ONLINE, then click AOL SYSTEM INFORMATION.
3. Click the UTILITIES tab.
4. Click the CLEAR BROWSER CACHE button until the CURRENT CACHE SIZE reads 0 KB, then click the UNINSTALL AOL ADAPTER or REBUILD AOL ADAPTER button.
5. Click the OK button.
6. Restart the computer and launch the AOL software again. The AOL Adapter will be rebuilt automatically.
